

HOW TO MEASURE YOUR SPACE

- 1) Always measure TWICE!
- 2) Measure from floor to ceiling
- 3) Take multiple measurements of a wall height and use the tallest measurement.
- 4) Note the locations of all electrical outlets wall switches, vents, openings and obstructions.
- 5) Measure any windows or doors and their locations.
- 6) Double check ALL measurements!
- 7) Add up any individual measurements and check against any overall measurement taken to be sure they match.
- 8) If measuring for door wraps, be sure to include the locations of any doorknobs, windows, kickplates, etc.
- 9) Use Feet and inches, NOT metric values. Do NOT use decimals!

We always add "bleed" to the measurements you supply. "Bleed" is extra material at the top, bottom or sides that will allow for an easier install if the artwork needs to be shifted a bit.
